

# Elementary School Tools

By educating young children about safe and proper medicine use, we can begin protecting them and their futures.

The **Start Smart** tools can help elementary schools and community organizations to educate children (grades K-5) and their parents about safe and proper use of over-the-counter and prescription medications.

**The new tools include:**  
Infographics, Posters, Parent Fact Sheets, and Student Workbooks (K-2 and 3-5).

To download the new **free** tools, visit:
